

Weigh-Comm

INNOVATIVE WEIGHING SOLUTIONS

Corporate Profile

WeighComm (Pty) Ltd (WCS) is a South African based Weighing Systems Solutions company. WCS, with three decades of experience, is focused on assessing the needs and changes required to existing and new weighing system applications. It provides strategic process and weighing solutions to customers in an environment which is constantly evolving around new technologies.

As a leading provider of business weighing solutions, preventative maintenance service contracts and related professional service, WCS delivers hardware and software solutions to this growing market. WeighComm has local and global alliances with technology and resource partners, who collectively provide specialist solutions to meet your business requirements.

A team of highly experienced business consultants develop and implement customised solutions based on reliable proven products and applications.

STRATEGIC SOLUTIONS

WCS' Strategic Solutions Concept is maintained by actively involving our business partners and suppliers. WCS works closely with its customers to gain a clear understanding of their business requirements and to ensure that a total solution is implemented through proven products, methodologies, expertise and skills.

The main impetus of the WCS operation is to develop strategic, long-term relationships with its customers. WCS approaches projects as a joint venture in terms of strategic partnerships and account management.

As a Condition of Contract, WCS provides skill transfer to its customers to ensure effective business continuity upon completion of all projects.
